

# Complete IAM for Healthcare

Healthcare organizations of all sizes, ranging from large hospital systems to specialty practices, rely on Identity Automation (formerly HealthCast) every day to provide patients with a higher quality of care. For over 20 years, we've designed innovative solutions purpose-built for healthcare's mission-critical environments. Ranked #1 in Identity and Access Management by KLAS Research in 2020, our comprehensive IAM platform, RapidIdentity, delivers unmatched security, breadth of identity management capabilities, and ease of use.

### ExactAccess

**Single Sign-On** enhances clinical workflows by automating fast, secure access to patient information and clinical applications.

### QwickAccess

**Proximity Badge Access Solution** provides fast and secure access to local and virtual desktops with the tap of a badge.

### EPCS

**Secure E-Prescribing for Controlled Substances** accurately verifies clinician identities using DEA-compliant two-factor authentication.

### RapidIdentity

**Identity & Access Management** increases security and business agility with comprehensive identity governance and administration, access management and multi-factor authentication.

### RightPatient™

**Biometric Patient Identification** utilizes iris and facial recognition technology to improve patient safety and help hospitals save millions every year.
