IT REMAINS CLEAR THAT CONGRESS AND THE EXECUTIVE BRANCH MUST ACT TODAY TO HELP SECURE HEALTHCARE

As part of its advocacy efforts surrounding cybersecurity, CHIME and AEHIS polled its membership in a survey to better understand the threats their organizations face, the resources they need and the education gaps that currently exist. The results continue to validate what those who have been active in the cybersecurity landscape have known for years: healthcare is under constant threat, more resources are needed for healthcare providers and significant education gaps remain.

Most common security exploits:
- Phishing/email compromise
- Malware
- Ransomware
- Hacking
- Insider threat

52% of respondents indicated they’d had a security incident in the last 12 months.

45% of respondents indicated they’d had a security incident in the last 12 months.

80% of respondents indicated the cost of cyber insurance had increased over the past year.

52% of respondents indicated they’d had a security incident in the last 12 months.

80% of respondents indicated the cost of cyber insurance had increased over the past year.

1. Phishing/email compromise
2. Malware
3. Ransomware
4. Hacking
5. Insider threat

Most common security exploits:
- Phishing/email compromise
- Malware
- Ransomware
- Hacking
- Insider threat

45% of respondents indicated they’d had a security incident in the last 12 months.

80% of respondents indicated the cost of cyber insurance had increased over the past year.

52% of respondents indicated they’d had a security incident in the last 12 months.

Emerging security threats:
- IoT/connected devices
- Increased remote workforce
- Supply chain
- 3rd party consumer health apps
- API security

80% of respondents indicated the cost of cyber insurance had increased over the past year.

All types of organizations are subject to cyberattacks

Providers report they need help in various areas:
